Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 2-3,6 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Pagan-'136.

Pagan discloses an air conduit 1 having a proximal opening and a distal opening 5; a seating tip 10,11, compressible structure 2 and supporting arms 17. Arms 17 extend axially (proximally) from the tip. The sides or top of arms 17 are basically axially or straight in shape. A portion of the esophagus receiving the plate 15 is essentially straight, in an axial sense. It is in this context that the examiner contends that the Pagan device reads on the present claims.

Claims 2-9 and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Augustine, et al-'695.

Art Unit: 3761

Augustine discloses a device having an air conduit 12, proximal opening 13, mask opening 35, compressible structure 30 or 38, supporting arms 24, and an angled surface (outer annular surface 35a) within the mask opening 35. The supporting arms have the claimed shape of substantially corresponding to that of the esophagus in the same context as outlined above with respect to the Pagan device. In addition arms 24 can be cylindrical which in another context would substantially correspond to that of the esophagus.

Claims 2-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Augustine, et al.-'859.

Augustine discloses a device having an air conduit 12, seating tip 123, mask opening 18, supporting arms between 123 and 127 in fig. 9b, fins 19 on compressible member 16, 122. The supporting arms may be covered by some other structure but nevertheless have the claimed shape for the same reasons noted above with respect to Pagan. The claims do not recite that the arms contact the esophagus.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 3761

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 11-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Augustine, et al-'695 in view of Brain-'388.

Augustine discloses the invention as claimed with the exception of the bars on the mask opening. Brain discloses the use of bars on a mask opening. It would have been obvious to have placed bars on the mask opening of the Augustine, as taught by Brain in col. 4 lines 66-68, as this would prevent collapsing of tissue into the mask opening.

Allowable Subject Matter

Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 3761

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
